50 YEAR CELEBRATION

Enhanced X-ray & X-ray Interpretation Seminar

As a part of our 50 YEAR CELEBRATION, Golden Engineering is hosting a one day Enhanced X-ray and X-ray Interpretation Seminar to say thank you to the EOD/PSBT Community. For Technicians, X-ray training lanes will be created and coordinated with the help of the Fort Wayne Indiana Bomb Squad. All training aids and equipment required will be supplied by Golden Engineering along with other industry partners. Training will meet the formal training requirement for bomb technician proficiency and training credit will be given for attending. The training seminar will be broken up to allow for participants to attend the morning, afternoon, or full day seminar.

A tour of the Golden Engineering facility and catered lunch will be included. Each Training Participant will be signed up for a free raffle for various X-ray accessories and the grand prize of a NEW X-ray Generator for winner's Bomb Squad or EOD Unit.

SEPTEMBER 19, 2023
